How to Register:

Visit us online at **Innovationstationpa.com** for more information and to register for these programs. Space is limited, so make sure to secure your spot today!

About Innovation Station:

Innovation Station, LLC was founded by a group of local Chester County master educators, dedicated to providing academic STEM experiences for area students. The goal of Innovation Station camps and after school programs is to inspire students in grades K-6 to discover their inner engineer, develop critical thinking skills, and problem solve when faced with a challenge. We teach students to embrace the learning that comes through failure, teach them to have a growth mindset about their work and persevere. We work with local districts to provide activities that are high interest, engaging, hands-on, relevant to their current learning and without question FUN! All of our camps and after school programs are run by teachers from the students' home schools. All of these factors are what make us unique! Each month is different so students may sign up for just one month or attend all year. New sessions are always opening! We can't wait to show you what we are all about as we bring new camps and clubs to your school!
